

# BORA 250

## Sanitizer for Coach and Bus up to 12 Meters

BORA 250 is a device equipped with the innovative KtV filter patented by NANO HUB.

BORA 250 uses the natural process of photocatalysis to absorb and convert light energy into free radicals. The radicals **destroy Sars-CoV-2, viruses, bacteria, allergens, fungi, molds, gases, VOCs (volatile organic compounds), odors, PM2.5 and PM10.**

The process of destroying viruses and bacteria is accelerated by up to 20 times by the network of copper nano particles, unique to the KtV filter.

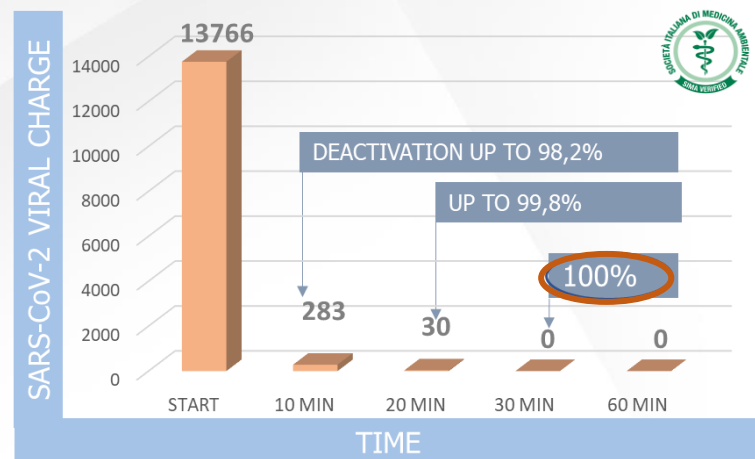

The device does not use biocidal chemicals or potentially harmful light sources. It can therefore be used safely in the presence of people and animals.

## Sars-CoV-2 Test San Raffaele

The effectiveness of the KtV filter has been tested against Sars-CoV-2 by the San Raffaele Hospital in Milan. Within 10 minutes, the viral load is deactivated by 98.2%, to zero completely in 30 minutes.

This test was verified by SIMA (Italian Society of Environmental Medicine).

## Features

- Technology: KtV
- Power Supply: 12/24 V/DC
- Consumption: 40W
- Dashboard Control Panel Operation
- 3 Fan Speed Levels for Air Flow Adjustment
- Nominal Air Flow at High Speed 250 m<sup>3</sup>/h
- Power "ON" Led Indicator
- Filter Maintenance Indicator
- Easy Access for Filter Maintenance
- Washable and Replaceable Dust Filter
- Noise Level: 58 dBA at 1-meter distance
- Dimensions (mm): (L)440 x (W)296 x (H)165
- Weight (kg): 8,5
- 2 Year Warranty
- Colour: white

Easy access for dust filter maintenance

## Operating modes

BORA 250 has 3 different fan speed levels. High speed provides maximum efficiency. Lower speeds allow for more comfortable and quieter operation.

## Installation example

made in Italy
