

EOLO 60

Automobile Air Sanitizer

EOLO 60 is a device equipped with the innovative KtV filter patented by NANO HUB.

EOLO 60 uses the natural process of photocatalysis to absorb and convert light energy into free radicals. The radicals **destroy Sars-CoV-2, viruses, bacteria, allergens, fungi, molds, gases, VOCs (volatile organic compounds), odors, PM2.5 and PM10.**

The process of destroying viruses and bacteria is accelerated by up to 20 times by the network of copper nano particles, unique to the KtV filter.

The device does not use biocidal chemicals or potentially harmful light sources. It can therefore be used safely in the presence of people and animals.

Sars-CoV-2 Test San Raffaele

The effectiveness of the KtV filter has been tested against Sars-CoV-2 by the San Raffaele Hospital in Milan. Within 10 minutes, the viral load is deactivated by 98.2%, to zero completely in 30 minutes.

This test was verified by SIMA (Italian Society of Environmental Medicine).

Features

- Technology: KtV
- Power Supply: 12-24 V/DC
- External Wall Voltage Adapter
- Max. Consumption: 14W (FAN max speed)
- Maximum battery life: 2h c.a.
- 3 Fan Speed Levels for Air Flow Adjustment
- Nominal Air Flow at High Speed 60 m³/h c.a.
- Ambient LED Lights with Functional Indicators
- Audible Feedback Functionality
- Easy Access for Filter Maintenance
- Washable and Replaceable Dust Filter
- Noise Level: 49 dBA at High Speed
- Dimensions (mm): (L) 145 x (W) 81 x (H) 50
- Weight (kg): 1,6
- 2 Year Warranty

Easy access for dust filter maintenance

Indoor Desk Version

EOLO 60 has an alternative configuration. The desk version is equipped with plug 5,5mm x 2,1mm jack + wall adaptor, a rigid Silicon frame designed for nice "soft touch" feeling plus a better surface grip and customizable colors.

3 LED FAN speed indicators

External fix frame to vehicle ceiling

ON/OFF, 3 FAN speed regulation button

made in Italy
