

# SCIROCCO 250

Commercial Indoor Air Sanitizer

SCIROCCO 250 is a device equipped with the innovative KtV filter patented by NANO HUB. SCIROCCO 250 uses the natural process of photocatalysis to absorb and convert light energy into free radicals. The radicals **destroy Sars-CoV-2, viruses, bacteria, allergens, fungi, molds, gases, VOCs (volatile organic compounds), odors, PM2.5 and PM10.**

The process of destroying viruses and bacteria is accelerated by up to 20 times by the network of copper nano particles, unique to the KtV filter.

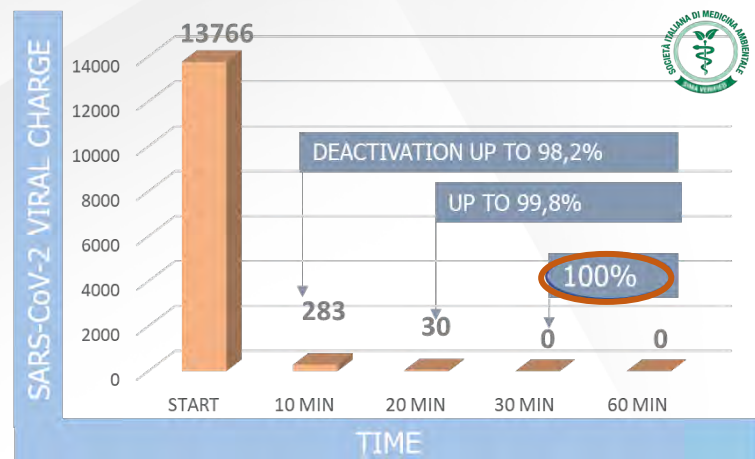

The device does not use biocidal chemicals or potentially harmful light sources. It can therefore be used safely in the presence of people and animals.

## Sars-CoV-2 Test San Raffaele

The effectiveness of the KtV filter has been tested against Sars-CoV-2 by the San Raffaele Hospital in Milan. Within 10 minutes, the viral load is deactivated by 98.2%, to zero completely in 30 minutes.

This test was verified by SIMA (Italian Society of Environmental Medicine).

## Features

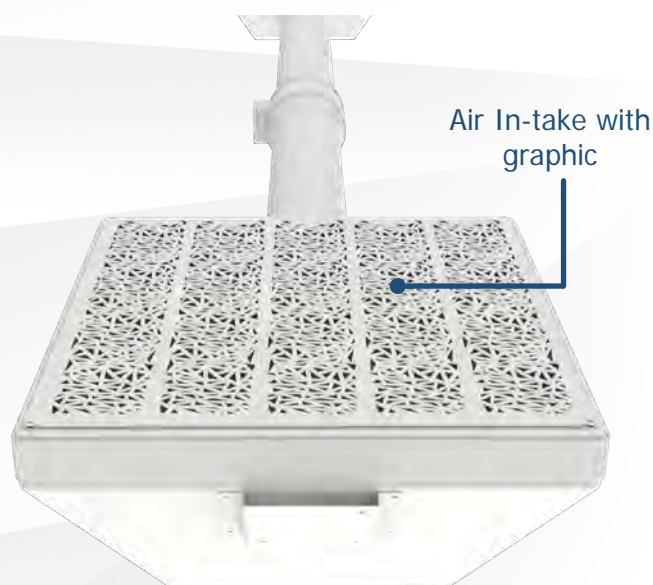

- Tecnologia: KtV
- Power Supply: 220-240 V/ac
- External Voltage Adapter
- Wall mount Control (ON-OFF/2 FAN speed)
- Max. Consumption: 60W at High Speed
- 2 Fan Speed Levels for Air Flow Adjustment
- Nominal Air Flow at High Speed 250 m<sup>3</sup>/h
- Integrated LED Lighting Module
- Easy Access for Filter Maintenance
- Washable and Replaceable Dust Filter
- Noise Level: 35 dBA at High Speed
- Standard Ceiling Grid Size
- Overall Dimensions (mm): (L)max.5400 x (W)600 x (H)295
- Peso (kg): max. 20,5
- 2 Year Warranty
- Colour: white

Easy access for dust filter maintenance

## Flexible Solution

SCIROCCO 250 is designed to be installed both outside (A) or inside ceiling/roof and drop ceiling system (B).

## Customable pipes length
